Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1794

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7-10, 18-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Naoi (6,180,263) or Dearnaley et al (6,087,025) or Welty et al (6,904,935) in view of Takenouchi et al (6,284,376) and Massler et al (6,740,393).

Naoi or Dearnaley et al or Welty et al disclose the known use of a carbon layer on a base through the intermediate layers. They do not explicitly disclose the thickness or the mixed components within the intermediate layers.

Takenouchi et al and Massler et al disclose the use of mixed intermediate layers of to improve the adherence of layers to each other and the base.

Thus it would have been obvious to one of ordinary skill in the art to provide the layers of Naoi or Dearnaley et al or Welty et al with additional layers of mixed components, as this technique is known in the coating art to improve adherence of layers as shown by Takenouchi et al and Massler et al. It also would have been obvious to one of ordinary skill in the art to minimize the thickness necessary of these layers, as one of ordinary skill would optimize thickness with effectiveness.

3. Applicant's arguments with respect to claims 7-10, 18-35 are have been considered but are moot in view of the new ground(s) of rejection.
